

TestDriveNow Quick Take Of The 2016 Mitsubishi Outlander (Video)

Much more than a traditional mid-cycle design “refreshing” that consists of minor aesthetic updates, the new 2016 Mitsubishi Outlander has been redesigned and reengineered to stand out in the competitive small crossover segment with its powerful and dynamic appearance and refined driving experience.

Combined with Mitsubishi’s reliability and safety standards, the 2016 Outlander is an unmatched value.

2016 Mitsubishi Outlander

The new 2016 Mitsubishi Outlander features a bold new exterior design, an eloquent yet functional interior space, and over 100 engineering and design improvements to the platform for better structural rigidity, ride quality and reduced noise, vibration and harshness (NVH).

The 2016 Outlander features Mitsubishi's new front design concept, "Dynamic Shield.

This feature is inherited from the bumper side protection seen on generations of the Montero, providing unique protection for both the people and car.

The exterior design incorporates a modern and aggressive-looking redesigned front fascia, along with new redesigned front fenders, halogen headlights, LED position lights, lower door sections, 18-in. alloy wheels, rear fascia and LED taillights (all models). For the top-of-the-line Outlander GT model, new exterior features include power-folding side mirrors, windshield wiper de-icer and LED headlights.
